

Autumn Brown

770-807-4104

autumnbrown23@pm.me

Smryna, GA

Profile

Recent IT graduate specializing in cybersecurity with hands-on experience in secure software development. Skilled in Python, database security implementation, and security framework architecture. Proven ability to lead development teams and implement enterprise-level security controls.

Experience

MERCHANDISE EXECUTION TEAM - THE HOME DEPOT; ACWORTH, GA

2024-PRESENT

Enhanced store merchandising efficiency and team collaboration through strategic project management and attention to detail. Independently executed complex merchandising initiatives while maintaining strong interdepartmental relationships and contributing to corporate service improvements.

MERCHANDISING - COSTCO; WOODSTOCK, GA

2022-2023

Enhanced the customer experience and boosted department sales by over 15% quarterly through strategic product placement and innovative merchandising layout. Demonstrated leadership and commitment to excellence in Front End and Morning Merchandising roles.

INTERN, SOFTWARE DEVELOPMENT - MARIETTA NON DESTRUCTIVE TESTING; MARIETTA, GA

2019

Created user-friendly graphical interfaces for daily customer use and developed backend systems for specialized non-destructive machines. Worked collaboratively with clients to analyze their requirements and determine potential contributions. Gained expertise in C# and deepened proficiency in Python.

Education

KENNESAW STATE UNIVERSITY | KENNESAW, GA

2025

Bachelor's degree in Information Technology (IT), focus on cybersecurity

Technical Skills:

- ▶ **Programming:** Python, Java, Git, Docker, SQL
 - ▶ **Web Technologies:** HTML/CSS
 - ▶ **Machine Learning & AI:** Local LLM inference (LM Studio/Ollama), transformer architecture understanding, large-scale data processing with LLM tool calling
- ▶ **Data & Analysis:** NumPy, data manipulation and processing workflows
 - ▶ **ML Frameworks:** TensorFlow (foundational knowledge)
 - ▶ **Security & Systems:** Nmap, Wireshark, Kali Linux, Network Security, Compliance, Information security, Secure software development, Database & API security.

Technical Projects

- MINETICKET - KSU CAPSTONE PROJECT

JAN 2024 - APR 2024
- Led Python development team to build a Minecraft server integration with a robust ticketing solution, implementing secure database interactions using MariaDB with comprehensive input validation and SQL injection prevention.
 - Architected a security framework including user authentication, role-based access controls, secure API endpoints with proper error handling, and applied secure coding principles throughout development with regular security reviews and documentation
